Amendments to the Specification

Please replace paragraph [0032] with the following replacement paragraph.

[0032] A second alternate embodiment of the present invention is shown in FIG. 9. In this embodiment, protector 226, similar to protector 26, includes a clip 270. Clip 270, which functions to replace flange 70 in the preferred embodiment, is slidably assembled to protector 226. Clip 270 is preferably made of a resilient material such as, for example, stainless steel, or any other suitable material known to those skilled in the art. As is shown, FIG. 10 clip 270 is a generally U-shaped wireform secured to protector 226 by bridges 264 and 266. To that end, clip 270 includes a pair of legs 272, 274, extending from yoke 276 with legs 272, 274 each extending into the hollow 278 of protector 226. Legs 272, 274 have respective bent-out free ends 280, 282 about bridges 266, 264, respectively.
